Turning construction vehicle

Number	090,56-0017
EAN	4029811470181

Product description

Turning construction vehicle

The self-assembly construction vehicle is a fantastic product for children who love to build and explore. This creative toy comes with parts that can be twisted and unfolded to create your own working construction vehicle.

The parts of the vehicle are connected with screws using the screwdriver included in the set. Thanks to this, the child can build his own personalized vehicle and learn how the construction machine works.

The self-rolling vehicle has a solid construction that ensures safety and durability while playing. Thanks to the flexible connections and moving parts, the child can control the movements of the vehicle and perform various construction tasks. We buy a complex vehicle, so it is complete for sure. Then we unscrew it and put it back together.

This toy not only encourages creativity and learning, but also helps to develop manual skills, motor coordination and logical thinking. It's a great way to spend time with your child and have fun together.

Gadget at a glance:
