Insect watching container

Number	18,046437
EAN	5413247046437

Product description

Insect watching container

The insect observation container is a great gadget for children who are interested in the surrounding nature. The plastic container has a grid on the bottom to measure the size of the insect. The lid is plastic, we look through it with magnification. The lid has holes so that insects can breathe. A great educational gadget that will allow for long observations, especially in the summer. Children like to observe insects in the garden, catch them while walking. This small handy container will be perfect for this.

Warning:

After the observation is completed, the insect should be released into the wild. It should not be kept in a container. During observation, be careful not to hurt him. We love nature and we care for it!
