Container for observing insects with tweezers

Number	18,045881
EAN	5413247045881

Product description

Container for observing insects with tweezers

A container for observing insects is a great gadget for children who are interested in the nature around them. The lid is plastic, we look through it with magnification. The lid has a magnifying glass thanks to which you can observe the details of the insect's structure. A great educational gadget that will allow for long observations, especially in the summer. Children like to observe insects in the garden and catch them while walking. This small, handy container will be perfect for this.

Warning:

After completing the observation, the insect should be released into the wild. It should not be kept in a container. When observing, be careful not to harm it. We love nature and we care for it!

Gadget at a glance:
