Product description

Self-inflating foil balloon - wild animalsSelf-inflating foil balloon - emoticons

A self-inflating foil balloon is an extraordinary toy that automatically fills with air, eliminating the need to use a blower or helium cylinder. This works thanks to technology that responds to pressure or movement, which causes the balloon to achieve its shape on its own.

Balloons are available in various shapes and colors, perfect for decorating birthdays, anniversaries or themed parties. After inflating, they retain their shape for a long time, constituting an attractive decoration and a source of joy for participants.
